PERSONAL PROJECTS

AmazonClone ⬈
- AmazonClone is full stack website with amazon features
- This website use firebase as backend and deploy platfrom
- We used react.js, html, javascript and VS code for the development.
- This website provides all the features of Amazon like payment, user sign up and sign in, wishlist basket, ordered items with the realtime data insertion and deletion .

OneCourse (html.css.javascript.react.js,firebase) (09/2021 - Present)
- OneCourse is web project is Created using React FrameWork at frontend , We used Microsoft Visual Studio As a Development Environment .we are using firebase as a backend and we are planning to publish this website.
- .As we know student spends lot of money to learn courses of java, c++, react like these technologies but there are also lot of courses playlists are available with best content free of cost.
- Main idea behind this project is find out best free courses available on requried subject and create the best route to complete that course .We gather the best Courses of all technology provides in a single website.
